Summary

Computer Engineering graduate from Penn State with hands-on fintech and full-stack engineering experience. Built a live algorithmic trading system outperforming the S&P 500, and delivered AI-powered web applications using modern engineering practices.

Skills

Languages: Python · Java · C++ · JavaScript · TypeScript
Frameworks & Front-End: React.js · Next.js · FastAPI · Tailwind CSS · HTML5 · CSS
AI & Machine Learning: Machine Learning · Prompt Engineering · Gemini API · Scikit-Learn
Data & Systems: Pandas · Database Design · Data Structures · Multithreading · Operating Systems
Tools & Platforms: GitHub · Supabase · Alpaca API · Microsoft 365 · Google Search API

Experience

DDAR Internship State College, Pennsylvania, United States
Penn State University – Division of Development and Alumni Relations Apr 2025 – Jul 2026

- AI Evaluation: Evaluated generative AI and predictive modeling tools to accelerate fundraising goals, delivering pilot-project roadmaps to Division leaders.
- Data Integrity: Audited AWA-to-Salesforce CRM migration, ensuring no high-value prospect records were lost during transition.
- Recruitment: Screened 100+ applicants and interviewed 15 candidates to select the 2026 intern cohort, managing the full recruitment lifecycle.

Online Program Moderator / Technical Assistant State College, Pennsylvania, United States
Penn State University – Smeal College of Business Feb 2025 – Jul 2026

- Technical Operations: Managed technical delivery for 6+ live sessions per week, supporting 20 senior leaders per session across supply chain and business disciplines.
- Real-Time Support: Configured virtual breakout rooms and resolved software issues in real time using Zoom and Microsoft Teams to ensure uninterrupted delivery.

EduSpark Bootcamp Participant Malaysia (Remote)
FutureLab.my Jun 2024 – Jul 2024

- Product Development: Co-developed a marketplace platform for Borneo artisans, placing 3rd out of 20 competing teams in the final pitch competition.
- Mentorship: Secured a paid mentorship with FutureLab following the pitch, continuing product development through a structured two-week startup program.

Education

Pennsylvania State University
Bachelor of Science, Computer Engineering May 2026
MARА Young Talent Programme (YTP) Scholar. Activities: Malaysian Students Club (External Vice President), The Borneo (Founding Member), Google Developer Club (Member).

INTEC Education College
American Degree Transfer Program, Engineering Jun 2022
MARА Young Talent Programme (YTP) Scholar, competitively selected for government-funded placement at Penn State University.

Certifications

Artificial Intelligence Foundations: Machine Learning (LinkedIn Learning) · Introduction to Prompt Engineering for Generative AI (LinkedIn Learning) · Learning GitHub (LinkedIn Learning) · Entrepreneurship Foundations (LinkedIn Learning)

Projects

Shariah Algo Trader shariah-algo-trader.onrender.com
Independent Fintech Developer

- Live Trading: Engineered a quantitative trading bot on a \$100K paper portfolio via the Alpaca API, outperforming the S&P 500 by 2.5% and SPUS ETF by 5% within the first week.
- Full-Stack Dashboard: Built a FastAPI backend and React/TypeScript dashboard for real-time portfolio, compliance, and factor-ranking visibility, with a pytest-covered test suite.

AI Resume Builder github.com/IlhamKassim/resume-builder
Full-Stack Developer

- AI Pipeline: Built an AI-powered resume tailoring pipeline using the Claude API with Zod-validated schemas to guarantee structured, ATS-safe output.
- Engineering Quality: Engineered a Next.js 16 App Router application with a Vitest test suite covering prompt construction, schema validation, and error handling.
